

# TUC Library Newsletter – May 2013

## News of Note

- The Library will soon be getting new carpeting, and electrical floor outlets will be added under the study tables. The carpeting and electrical work will begin on the Library's north side (quiet study area), and when that half is completed the work will be repeated on the Library's south side. Construction on the north side will begin Monday, June 3, and the entire project is tentatively scheduled to be finished around mid-July. In preparation for the start of the construction, furniture on the Library north side will be temporarily moved into storage starting after Memorial Day. Study rooms on the north side, the journal stacks, and the bathrooms will not be available during construction work on the Library north side. Watch for further announcements on the [Library website](#) or [Facebook page](#).
- The Library currently has trial access to [VisualDx](#), which is a point of care tool for clinical decision support. Read more about VisualDx on the [Library's news page](#), and please send all feedback on VisualDx to Tamara Trujillo by May 15.
- The Library has ordered a subscription to Pediatric Care Online. This resource from the American Academy of Pediatrics includes a point-of-care quick reference tool, full text of the *AAP Textbook of Pediatric Care*, Bright Futures, a Visual Library containing hundreds of images, AAP policy, *Red Book* content, pediatric drug look-up, and more. There is also a mobile app. Watch the [Library website](#) for an announcement when this resource becomes available.
- Another new resource is [Thieme eNeurosurgery](#), which the Library decided to subscribe to after feedback from a recent trial period. Thieme eNeurosurgery contains more than 250 illustrated procedures, access to Thieme's entire neurosurgical eBook library, more than 30,000 images, and the ability to search neurosurgery eJournals. Note that only one user can use this resource at a time.
- You can now search over 85,000 ebrary eBooks alongside journals and other sources using ProQuest databases. If you search [ProQuest \(All Databases\)](#), ebrary results will show up in a separate tab in your search results. If you search a specific ProQuest database, such as Health and Medical Complete or ProQuest Education Journals, the ebrary database will not be included in the search. You can add the ebrary database by clicking on the 'databases' link in the upper left corner of the search page. Note that you can also use the [Library Catalog](#) to search ebrary titles.
- The Library's conference room, Room 209, is now available to be reserved on EMS.
- The Library has been able to order subscriptions to a number of additional journal titles requested by faculty or students. Typically journal subscriptions are for online access only. We will post the titles of the new journals on the [Library website](#) as they become available. The first new journal title is: [Health Affairs](#).

## May's Hours

Please see the attached for May hours, or [click here](#) for the complete spring hours.

## Resource Spotlight: TUC Library's Exam Resources

The Library has a number of tools to help students prepare for board and professional exams. To find exam preparation books and eBooks, search the [Library Catalog](#) for the name of your exam (e.g., USMLE, COMLEX, NAPLEX, PANCE, CSET, etc.). If we have additional exam preparation e-resources (e.g., Exam Master, CPH Study Guide, etc.), they will be listed in the Exam tab of the [Research Guide](#) for your college or program. Also in the Exam tab of many Research Guides are resources that can help with general study skills. If you have any questions about locating exam preparation resources, please ask a librarian for assistance. Good luck studying!

## Featured New Resource: Teaching Assistant for Anatomy

Another very newly added resource is [Teaching Assistant for Anatomy](#) from Thieme Publishers. It is described as a “presentation tool” for teaching, as well as a study tool. It contains all 2000+ illustrations and images from the *Atlas of Anatomy*, 2d ed. by Anne Gilroy (used by COM and PA classes) as well as additional content from *Head and Neck Anatomy for Dental Medicine*. The Teaching Assistant allows one to export images as individual files or embed into PowerPoint slides or PDFs. One can turn individual labels “on” or “off” to prepare study guides, tests, etc., and images can be magnified for improved clarity.

## New Acquisitions

[Click here](#) to see what books, videos, and other Library materials were added to the Library collection in April. If you have suggestions for items the Library should consider purchasing, please send them to [Tamara Trujillo](#).

## Other Library News

More Library news can be found on the [New in the Library page](#), or follow the Library on [Facebook](#).
