

We are trying out this newsletter format to get information about the Library to you in a brief and consolidated way. We are planning to spotlight one e-resource per month. In this way, we want to bring to your attention some of the wonderful e-resources we have in the TUC Library that not all of you may know. Your feedback to the contents and format and suggestions for future “issues” would be much appreciated.

Tamara Trujillo
Library Director

TUC Library Newsletter - October

October's Hours

See the attached for October's Library hours, or [click here](#) for the fall hours.

Upcoming Workshops: Scopus Training

This summer the Library began a subscription to the database [Scopus](#). Scopus is the largest abstract and citation database. Citation databases can help you identify leading articles on a topic and track citations to find newer articles that cite older articles. Scopus contains both peer-reviewed research literature and quality web sources. Scopus also offers smart tools to track, analyze and visualize research. It is a comprehensive resource to support research needs across all disciplines.

The Library will be offering live webinar trainings conducted by a Scopus trainer. The first webinars are meant for faculty and will be offered **October 16th and 18th from 12pm-1pm**. Faculty should watch their email for the formal webinar announcement, or ask [Becky Miller](#) for more details. Student trainings will be scheduled and advertised soon. In the meantime, to learn more about Scopus you can view the [fact sheet](#) or the [8-page quick reference guide](#). Additionally, the Scopus help menu (link is in upper right corner of Scopus interface) contains links to numerous video and web-based tutorials.

Resource Spotlight: Procedures Consult

[Procedures Consult](#) is a multimedia training tool that teaches how to prepare for, perform, and follow up on the most common procedures required in today's hospital setting. Procedures Consult covers the procedures required by the ABIM (American Board of Internal Medicine) and conforms to ACGME standards. You can search Procedures Consult for a particular procedure, or you can browse by specialty or region of the body. TUC's subscription provides access to the General Surgery, Family Medicine, and Training Physician procedure packages. Procedural content includes animations and videos (including Video Key Steps); “Quick Review” text and illustrations; checklists; and self-directed quizzes to test your knowledge. Also included are medical tips from experts that convey clinical ‘pearls and pitfalls.’ Procedures Consult is especially useful to students on surgery and Ob-Gyn rotations.

Procedures Consult Mobile lets you view content within a user interface optimized for mobile devices. Additionally, there is a Procedures Consult app available in the iTunes App store for iPhone/iPad users, which allows you to access stored content offline. To learn how to access Procedures Consult Mobile or the iPhone/iPad app, see instructions in the [Mobile Guide](#).

Please give Procedures Consult a try and let us know what you think. Is it useful? Is there something else out there that is better? We always appreciate your feedback on Library resources. – [Becky Miller](#)

New Acquisitions

[Click here](#) to see what books, videos, and other Library materials were purchased in September. If you have suggestions for items the Library should consider purchasing, please send them to [Tamara Trujillo](#).
