New Physical Locations for DVDs and CDs

Over Winter Break the Library began a project to make our DVD and CD collections easier to browse. Cases for most DVDs or CDs in the Library's collection are now located on two sets of shelves across from the Vending Room. All curricular-related DVDs or CDs in the Library's main circulating collection will be represented by a case on these shelves. Cases can be taken to the Library Circulation Desk to retrieve and check out the CD or DVD. All cases for DVDs in the Library's Leisure collection are still located with the Leisure Collection materials on top of the short shelf near the Circulation Desk. All media items in the Library's circulating collection can be checked out for a week at a time.

Library Workshops

Join us on January 27th at 12:15 pm for the first TUC Library Workshop. Librarian Dorothy Ogdon will give a short introduction to Boolean Searching in Room 112 in the Library Annex. Please feel free to bring whatever device you wish to use (laptop, tablet) if you would like to practice searching during the workshop. Hands on exercises and help will be available. General questions about the Library are also welcome.

More Standing Desks for the Library

We heard you! There have been a number of requests both to Dr. Berkley at the Bagels with Berkley event and to the TUC librarians for more standing desks in the Library. As a result two more standing desks for the Library were ordered and are now in place. One of the two new standing desks is on the Library silent side (north side). Having one there has been a repeated request, and the other desk has been placed on the south /collaborative side increasing the number of standing desks there to three.

News about Library Resources

Resource Spotlight: [Bates' Visual Guide to Physical Examination with OSCE \(Objective Structured Clinical Examination\) Clinical Skills Videos.](#)

Each month we focus on one Library resource of general interest. This month's Bates' Visual Guide is a teaching and learning tool. The Bates' videos demonstrate head-to-toe and systems-based physical examination techniques on different patients. The OSCE videos are designed to help with preparation for Objective Structured Clinical Examinations (OSCEs) by testing clinical reasoning skills. Each video presents a clinical encounter and viewers are given the opportunity to develop an assessment, or differential diagnosis, and provide an appropriate diagnostic workup. Our subscription contains 18 volumes of the Bates' Physical Examination Videos and 5 OSCE Clinical Skills Videos.

E-Book of the Month

This month we are highlighting the ebook [How to Start an MTM Practice: A Guidebook for Pharmacists](#), written by Judy Lofton. This book was written as guide for pharmacists interested in developing medication therapy management (MTM) services. The book contains information on operations planning, steps for developing a service, and rationale and guidelines for developing a business plan. Students, Faculty, and Staff can access this book by searching for the title or author in the [TUC Catalog](#) or by following the link below:
